Experience at ORGANISATION

I am involved in RAIDs since December 2012 and I met most of the colleagues for the first time at the RAIDs meeting in Berlin. I look forward to the further cooperation.

Research topics

A phase I/II trial to investigate the safety, immunity and clinical efficacy of HPV 16 DNA vaccination in combination with chemo-radiation in advanced cervical carcinoma.

The role of the immune system in cervical cancer.

Highlights of involvement in RAIDs

It is a great experience to work in a large European cohort because I can learn a lot from working together with different highly educated colleagues from multiple nationalities.

Education

- 2013-present Research thesis on the role of the immune system in cervical cancer.
- 2004-2010 Medical degree, Vrij Universiteit Amsterdam

Publications & Awards

1 (in Dutch Medical Journal)
